The combi lift for Showering and bathing!

The unique, modern EVE! Shower and bathing lift is exactly the right tool to be able to shower or bathe your residents safely and comfortably at any time, depending on their mobility level.

EVE! is extremely agile and easy to maneuver. It can be used flexibly in any modern bathtub. The battery-operated electric drive enables the height to be adjusted continuously and very quietly and therefore without any feelings of discomfort for the resident.

The hand control enables the caregiver to operate the lifter safely and easily. The lifter can be operated by just one caregiver. An integrated service module reports malfunctions on the lifter as well as due maintenance.

Group 1  

Group 2  

Group 3  

Low entry height of 49.5 cm enables easy self-entry

Ergonomic safety handles enable precise maneuvering

Comfort seat with care opening

Fits easily in any modern care bathtub

Optional: integrated patient scale

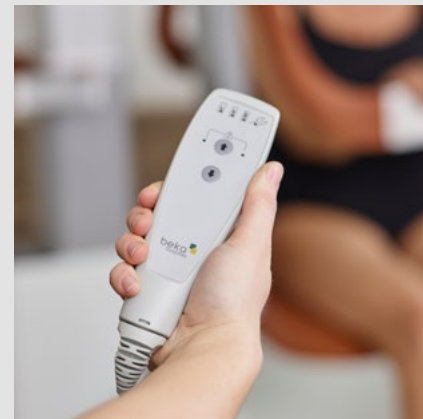

High quality aluminum and stainless steel construction

Easily mobile double castors, two of them with brakes

Battery and emergency stop function

Cable control with Display of the battery and service status

100% usable as a shower chair & bathing lift

EVE! is the universal aid in the care bath and works as a shower chair and/or as a reliable bath lift. Thanks to its easy handling, it can be operated by only one caregiver.

Comfort seat with removable PUR pad

The specially shaped seat has a large hygiene opening. The pad is made of high quality PUR material and can be easily removed, cleaned and reattached.

Modern, high quality design

With EVE! you have an easily maneuverable bathroom lifter that impresses with its unique design. It is made entirely of stainless steel and aluminum.

Easy self-entry

The chassis is shaped in such a way that your (partially) mobile residents can easily get on their own. The lowest entry height is 49.5 cm.
