

AVERO Phoenix

Height adjustable Care bath
in an elegant and exclusive design

Watch product video!

Maximum bathing comfort
and high quality design combined!

The AVERO Phoenix lifting bath instills confidence with selected, high-quality materials and a modern design. All functions were designed in close cooperation with nursing and therapy specialists and adapted to practical experience. This gives bathers and nursing staff maximum safety and comfort for a wonderful bathing experience.

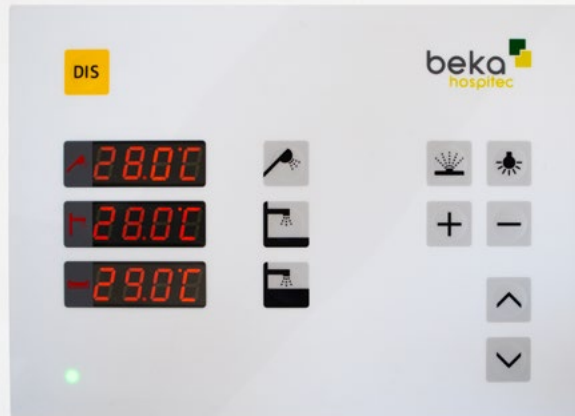

The operating and control unit of the AVERO Phoenix impresses with its clear, well thought-out design and layout, which prevents incorrect operation and makes work easier for the caregivers.

Operating panel with temperature display

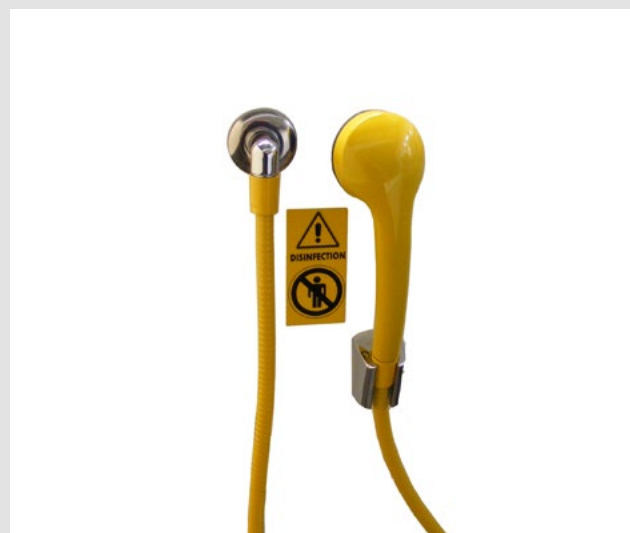

Great shoulder room with enough space
also for large residents

The lowered foot area supports ergonomic lying

Accessible from three sides
with all modern patient lifts

Optional: disinfection unit with integrated shower hose

Large armrests with high quality ergonomic handles
offer enhanced safety to bathers

High quality designer bathtub

The sophisticated design of the AVERO Phoenix enables numerous benefits for caregivers and residents without having to compromise on aesthetics.

Lowered foot area & special back profile

The lowered leg area offers bathers reliable support. Together with the distinctive armrests and the molded back profile, the components form the basis for the extremely ergonomic tub body. This ensures a relaxed and safe bathing process with sufficient hold, especially when used with seat lifts.

Intuitive operating and control unit

All functions of the bath can be easily controlled using the control panel integrated in the console. The water temperature of the bath spout, bathing water and hand shower are always displayed.

Wide tub body offers plenty of space

Residents of all sizes enjoy sufficient freedom of movement in the body of the AVERO Phoenix.
