Simply create a welcoming environment
in your care bath.

The AVERO Comfort lifting bath fits easily into existing wellness and bathing concepts of care facilities. The special design, which is reflected both in the tub interior and in the outer finish, create clear and soft shapes.

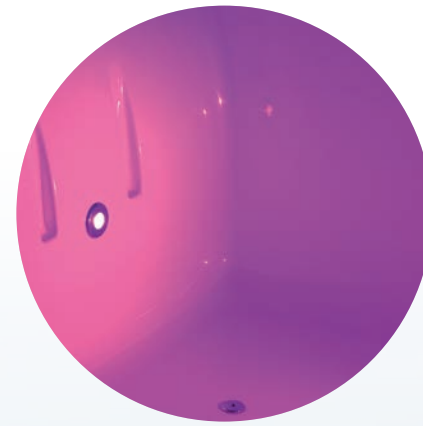

This unique bath design is reminiscent of modern and contemporary private bathrooms and thus awakens a domestic character that positively influences the well-being of residents. The care tub can be turned without any problems, so that the bather can have a clear view of the room.

Promote the sensitive perception and relaxation of your residents!

With our exclusive wellness options.

Colored-light system

The colored-light system creates a relaxing and optically stimulating atmosphere for the well being of your resident. It is equipped with a free choice of colors as well as with an automatic sequence program for color changing.

AirSpa system

The AirSpa system offers a pleasant and stimulating effect. The pleasing sensation on the skin provides for relaxation and tranquillization, especially for agitated patients while stimulating the perfusion of the skin. The jets are specially protected to prevent bacterial contamination eliminating the need for an internal disinfection device.

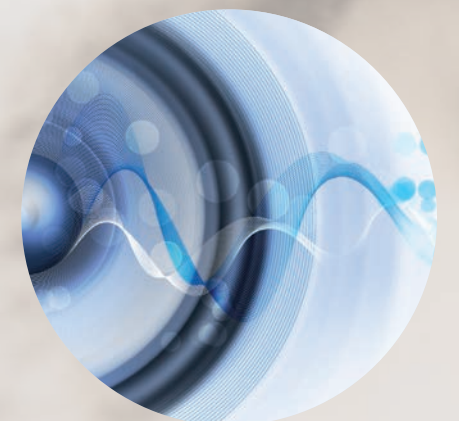

Aroma system

The Aroma system allows the application of various scents, that together with the warm air from the AirSpa system and the bathing water, offer a wonderful experience for the senses of your resident. The system is easy to operate and maintenance-free. This option is only available in combination with the AirSpa system.

Bluetooth system

While bathing, the residents can enjoy a relaxing and stimulating sound experience with the optional bluetooth music sound system. Connect your device via Bluetooth and provide your individual music selection.

Optional: Integrated branded thermostat with legionella flushing

Freely accessible by all modern bath lifts

Intuitive hand control with symbols for all functions

Ergonomic inner tub body
with large armrests and handles

Clear and soft forms of the AVERO Comfort
are reminiscent of modern private bathrooms

Optional: Change the direction of view

Modern design with an elegant character

The AVERO Comfort fits easily into modern care bath concepts and ensures through the elegant, domestic look for a familiar feeling when bathing.

Generous, ergonomic inner tub body

Due to the large recessed armrests and the ergonomic handles, residents always have optimal support in the care tub.

Numerous options for individual requirements

In addition to our extensive wellness options, which effectively contribute to the well-being of bathers, the AVERO Comfort also offers additional options in terms of safety and hygiene.

Model with multi-functional stretcher

An unique opportunity to take care of your residents directly over the care bathtub, to change and shower. Our patented solution thus enables work in the tightest of spaces.

Multi-functional nursing and shower stretcher

Take care of your residents directly above the bathtub. Our unique, patented design offers numerous advantages. The AVERO Comfort can be used without restriction in its function as a care bathtub with an integrated multifunctional stretcher:

- ✓ Unique, patented design
- ✓ Fully-fledged, height-adjustable shower stretcher
- ✓ Space-saving stretcher design mounted directly on the care tub
- ✓ Avoid unnecessarily long transfer routes

Note: The multi-functional nursing and shower stretcher cannot be retrofitted, it has to be ordered in combination with an adapted AVERO Comfort bath.

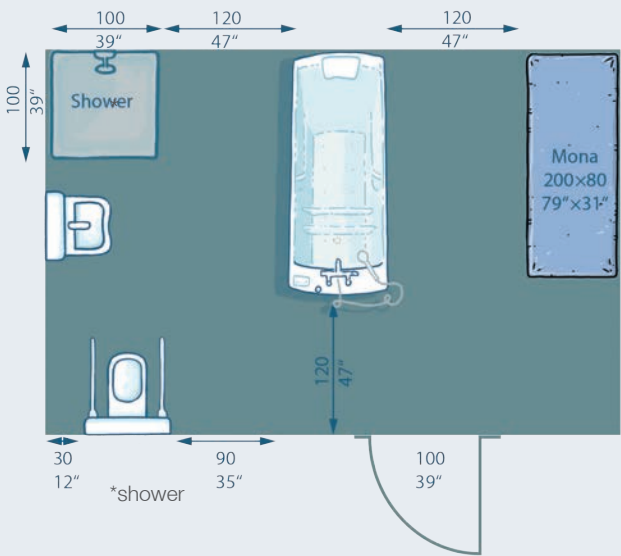

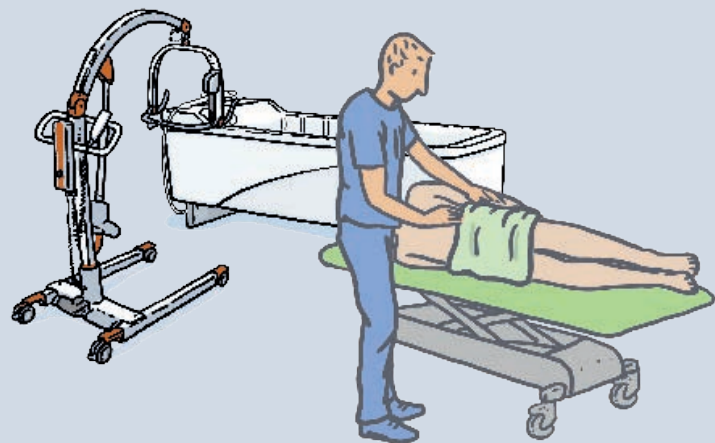

„AVERO Comfort offers us all the advantages for a relaxed bathing process..“

- ✓ Stepless height adjustment of the tub for the optimal working height
- ✓ The automatic water stop option enables the tub to be filled without supervision
- ✓ Easy operation via the cable remote control with intuitive symbols for all functions of the bath
- ✓ Non-porous surface of the tub for an easy Cleaning of the tub

Space requirements for AVERO Comfort using an example Planning proposal.

The AVERO Comfort can be placed anywhere in the room. The viewing direction can be changed allowing an unobstructed view for the occupant.

A strong team.
