The ideal solution for residents weighing up to 230 kg.

The CARLO Alu patient lift, model Classic 230, has been specially designed for lifting, repositioning and transferring residents in need of care up to a maximum patient weight of 230 kg. Thanks to the special design made of aluminum and steel components, the lift is extra light and manoeuvrable, but still offers the stability required for the care of heavy residents.

The extra-wide 4-point stainless steel sling bar is suitable for all sling straps and is characterized by a patent-pending adjustment option for rotation reduction (ARM).

Group 3 Group 4 Group 5

Stable 4-point loop bar

The CARLO Alu, Classic 230 belt bar is suitable for all loop belts and has a safety locking mechanism for the belt holder. The distance between the mounting bar and the lifting pole is large so that residents have more space during the transfer.

Anti-rotation mechanism

The anti-rotation mechanism (ARM) prevents unpleasant swinging or rotating movements during lifting and transfer.

For heavy residents up to 230 kg

With the CARLO Alu, Classic 230, you can easily transfer residents weighing up to 230 kg. The special construction made of aluminum and steel components provides the necessary stability and is still easy and maneuverable for the caregiver to drive.

Technichal Data

Chassis (W x H)	1.400 mm x 125 mm
Width inside (closed/spread)	540 mm / 1.040 mm
Width outside (closed/spread)	700 mm / 1.180 mm
Stroke	1.400 mm
SWL	230 kg

Product information

Stable aluminum-steel construction
Hand control with battery charge status display
4-point loop handle with safety locking mechanism
Electric height adjustment and electrically spreadable chassis
Anti-rotation mechanism (ARM)

Available Options

Extra battery 24 V

Wall charging unit

Digital patient scale

Clip Slings

Transfer slings
With headrest
Padded leg loops
High quality nylon material

Bathing slings
With headrest
Padded leg loops
High quality nylon-mesh material

Toilet slings
With headrest
Padded leg loops
Arm padding

Soft slings
With headrest
Padded leg loops
Breathable nylon/cotton blend
