

NORA Trend

beka DIFFERENT
BY DESIGN

Improving mobility and providing a higher quality of life.

The stand-up and raising aid NORA Trend was specially designed for residents who still have the ability to stand for a short amount of time with the help of supporting tools. With the NORA Trend caregivers have the ideal tool to transfer these residents safely in an ergonomical way.

It also offers the excellent opportunity to mobilize your residents, stabilize and improve their musculoskeletal system.

NORA Trend is easy to maneuver and can be used by one caregiver. BEKA Hospitec also offers suitable stand-up slings.

Improves the mobility of your residents

Residents who are being transferred with the NORA Trend learn to stabilize both the body and help circulation during mobilization. This can lead to a better quality of life for your resident.

Comfortable, flexible knee pads

The ergonomically shaped knee pads are individually adjustable in height to perfectly suit each resident. They prevent painful pressure on the kneecaps during the standing up motion.

Easy to maneuver by only one caregiver

The highly maneuverable mobility aid can be conveniently operated by one caregiver. Thanks to the smart ergonomic concept, back injuries and incorrect strain on caregivers can be prevented.

Technical Data

Length	1.014 mm
Outside width legs, chassis closed	702 mm
Inside width legs, chassis spread	870 mm
Weight	ca. 51 kg
Height (min. / max.)	1.168 mm / 1.170 mm
SWL	200 kg
Battery	24 V

Product Information

Electrically, spreadable chassis
Flexible, height-adjustable knee pads with safety belts
Emergency lowering function
Ergonomic handles
Hand control with symbols for all functions and display of the battery status

Available Options

24 V replacement battery

Wall charger

Sit-to-stand slings

Sit-to-stand sling with clip
Arm and back support with anti-slip coating
