

NORA Pro

beka DIFFERENT
BY DESIGN

Excellent comfort, secure hold and a natural, ergonomic standing-up motion.

NORA Pro's 3D-Comfort-System, which consists of a large, flexible Memory- Foam cushion, is the centerpiece of the lift, offering unique comfort and an excellent leg support during the transfer.

The dementia-sensitive color design supports residents with orientation difficulties and provides them security through it's high contrast.

NORA Pro comes with a powerful Lithium-Ion battery system.

The 3D-Comfort-System

Next generation
Lifting comfort.

The 3D-Comfort-System enables ergonomic lifting through it's 2 swivel axles, that perfectly adapt to the natural up and down movement of the resident's legs, always providing maximum comfort.

The Memory-foam padding offers residents a secure grip in the cushion: the legs are comfortably surrounded by the Memory-Foam during the lifting process. The large cushion supports different body sizes and leg shapes.

Natural Standing-Up movement due to the 3D-Comfort-System and horizontal footplate.

The 3D Comfort System of our NORA Pro sets new standards in comfort and safety on the patient lift market. In conjunction with the horizontal footplate, a very natural and ergonomic lifting motion is achieved.

The additional sling attachment points also ensure a comfortable transfer for residents with a body height under 1.60 m.

Residents enjoy a natural lifting motion and standing position with NORA Pro

The optional Leg separator provides additional stability and supports the nursing staff in changing diapers

- ✓ 3D-Comfort-System with flexible Leg support made of multi-layer Memory-foam
- ✓ Large cushion that supports different sizes of residents and leg shapes
- ✓ Natural standing-up movement and a secure hold in the leg support cushion

- ✓ 3D-Comfort-System
- ✓ Lithium-Ion battery
- ✓ Lightweight, compact aluminum construction with excellent maneuverability
- ✓ Detachable, horizontal footplate
- ✓ Retractable safety belts
- ✓ Additional sling attachment points for better adaptability to smaller residents

Compact and lightweight aluminum construction in contemporary design and with excellent maneuverability

Powerful Lithium-Ion battery with a LCD display, operation of all functions (in addition to the hand control)

The horizontal footplate is easily detachable

The active lifter is suitable for going to the toilet with residents

NORA Pro is ideal for showering of the resident's backside

The additional attachment points prevent smaller residents from having unpleasant sling pressure under their arms

The safety belts of NORA Pro are equipped with a practical retraction mechanism

Ergonomically shaped handles for a secure hold even with restricted grip function

Dementia-sensitive color concept
RUBIN

High-contrast
for good guidance
of your residents.

All contact surfaces of the NORA Pro are highlighted in a pleasant red tone.

Leg support, grip handles and footplate of NORA Pro are colored in a pleasant red and serve as a good orientation with high perceptual value for your residents.

Red is most likely to be noticed by people suffering from dementia*

Studies* show that red is best perceived by people suffering from dementia and residents with decreasing eyesight in old age in general. The standard version of NORA Pro therefore supports residents with it's high-contrast color concept.

*Wijk, H., Berg, S., Sivik, L., & Steen, B. (1999). Colour discrimination, colour naming and colour preferences among individuals with Alzheimer's disease. *International Journal of Geriatric Psychiatry*, 14(12), 1000-1005.

*Dunne, T. E., Nearing, S. A., Cipolloni, P. B., & Cronin-Golomb, A. (2004). Visual contrast enhances food and liquid intake in advanced Alzheimer's disease. *Clinical nutrition (Edinburgh, Scotland)*, 23(4), 533-538.

„NORA Pro is the ideal aid for everyday use in care facilities. It offers plenty of helpful details and suits a lot of residents!“

- ✓ Handling by one caregiver possible
- ✓ The compact frame, the closed castors and the lightweight aluminum construction make it extremely easy to maneuver
- ✓ The display offers full function control of the stand-up aid, in addition to the hand control
- ✓ NORA Pro supports many types of residents with different body sizes and leg shapes

Space requirement NORA Pro

Due to its high maneuverability, NORA Pro is suitable for patient and bathrooms with limited space. The use of NORA Pro (if possible !) is preferred over the use of passive lifters.

Technical Data

Length	994 mm
Width (min.)	704 mm
Inside width legs, chassis spread	910 mm
Weight	49,1 kg (without battery)
Height (min. / max.)	1.091 mm / 1.659 mm
SWL	205 kg
Battery	Lithium-Ion

Product Information

Electrically, spreadable chassis
Lightweight aluminum construction
Additional sling attachment points for raising residents under 1.60m in height
3D-Comfort-System: Large, flexible leg support cushion made of Memory-foam
Safety belts with a retractable mechanism
Emergency lowering function
Closed double castors
Ergonomic grip handles, specially made for residents with limited grip function
Hand control with symbols for all functions and display of the battery status

Available Options

Replacement battery

Wall charger

Leg separator

Sit-to-Stand Slings

Sit-to-stand sling NORA Pro with clip
Arm and back support with anti-slip coating
Double safety straps for the chest area
Additionally padded chest strap
