Robust patient lift with anti-rotation mechanism (ARM) and electric positioning system (EPS).

The electric positioning system (EPS) of the CARLO Alu, Comfort EP 185 enables caregivers to position their residents effortlessly, precisely and without exertion, while always maintaining direct contact.

This way, caregivers are able to devote their full attention to residents, giving them an additional feeling of security while maintaining an ergonomic working posture at the same time. Residents can easily be transferred from a sitting to a lying position and vice versa, allowing for an optimal positioning in bed or over the toilet.

Residents experience a noticeable pressure relief on their legs, especially when lying down. The anti-rotation mechanism (ARM) prevents unwanted rotation of the sling during transfers and reduces unsettling swinging and swaying movements allowing for a single caregiver transfer without sacrificing resident security.

Electronic positioning system (EPS) for precise and effortless positioning.

Anti-rotation mechanism (ARM)

Electrical spreadable chassis and height adjustment

Technical Data

Chassis (L x H)	1.290 mm x 125 mm
Inner leg width (legs closed/open)	540 mm / 1.040 mm
Outer leg width (legs closed)	700 mm / 1.180 mm
Lifting range	1.400 mm
SWL	185 kg

Product Information

Light and easy to maneuver
Hand control with display of the battery status
Clip-system hanger bar with 360° rotation range
Electric height adjustment and electrically spreadable chassis
Anti-rotation mechanism (ARM)
Electric positioning system (EPS)

Optional: digital scale

Free 360° rotation range between the hanger bar and the column

Lowering of the hanger bar to the floor

Available Options

- 

Extra battery 24 V
- 

Wall charging unit
- 

Digital patient scale
- 

Low chassis

Clip Slings

- 

Transfer slings
With headrest
Padded leg support
High quality nylon material
- 

Toilet slings
With headrest
Padded leg support
Arm padding
- 

Bathing slings
With headrest
Padded leg support
High quality nylon-mesh material
- 

Soft slings
With headrest
Padded leg support
Breathable nylon/cotton blend

Hand control with display of the battery charge status

High quality double castors

Ideal for bathing and showering
