

## AVERO Premium plus

Height adjustable Care bath in classic design

Watch product video!

## Functionality meets wellness.

The AVERO Premium plus lifting bathtub was developed in close cooperation with nurses and occupational therapists. The ergonomic tub body with the lowered foot area and high-quality materials enable a relaxation bath with a wellness character. The tub body and the foot construction allow the use of all modern care lifts on the market.

The AVERO Premium plus stands freely in the room without anchoring to the floor and is therefore freely accessible from 3 sides. A control panel with symbols prevents incorrect operation and simplifies the work of the nursing staff. Available in different bath lengths as model 175 or model 190.

Operating panel with temperature display

Accessible from 3 sides with all modern lifters

Great arm and shoulder room

The lowered foot area supports ergonomic lying and prevents slipping

Large armrests with high quality handles offer safety and comfort to bathers

Optional: integrated disinfection system

## Lowered foot area & special back profile

The lowered leg area offers bathers reliable support. Together with the distinctive armrests and the molded back profile, the components form the basis for the ergonomic tub body. This ensures a relaxed and safe bathing process with sufficient hold, especially when used with seat lifts.

## Intuitive operating and control unit

All functions of the bath can be easily controlled using the control panel integrated in the console. The water temperature of the bath spout, bath water and hand shower is always displayed.

## Wide tub body offers plenty of space

Residents of all sizes enjoy sufficient freedom of movement inside the body of the AVERO Premium plus.

## Technical Data

|  |   |
|--|---|
| Total dimensions* ( L x W )              | 88 x 32 in                                  |
| Inner tub body dimensions* ( L x W x H ) | 70 x 23/28 x 17/19.3 in                     |
